

*AppCompatActivity*

*OnItemSelectedListener*

*io.github.szygy2048.radcloud.MainActivity*

```
classDiagram
    class AppCompatActivity
    class OnItemSelectedListener
    class MainActivity["io.github.szygy2048.radcloud.MainActivity"]
    MainActivity --|> AppCompatActivity
    MainActivity --|> OnItemSelectedListener
```

The diagram illustrates the class hierarchy and interface implementation. At the top, two boxes represent the superclass *AppCompatActivity* and the *OnItemSelectedListener* interface. Below them, a box represents the subclass *io.github.szygy2048.radcloud.MainActivity*. A horizontal line with upward-pointing arrows at both ends connects the MainActivity box to the AppCompatActivity and OnItemSelectedListener boxes, indicating that MainActivity inherits from AppCompatActivity and implements the OnItemSelectedListener interface.
